WORK EXPERIENCE

Freelance / Self-employment

03/2017 – Present

As a Senior UX/UI Designer operating independently, I have successfully led the end-to-end design and development of projects, websites and digital products for a diverse range of clients across industries (online-shops, independent studios, delivery services, real estate agencies, restaurants etc.). My work combines strategic thinking, user-centered design principles, and front-end development to create seamless digital experiences that align with client goals. Work samples are provided at the end of this CV.

- Designing flexible and attractive user interfaces (UX/UI) with Figma and Adobe Photoshop to enhance user engagement and conversion rates.
- Designing and developing responsive, mobile-first websites using modern HTML5, CSS3, and basic JavaScript, ensuring accessibility and cross-device compatibility.
- Developing corporate websites, e-commerce platforms using CMS tools such as WordPress and Opencart, business card websites, and landing pages.
- Conducting in-depth research on target audiences, competitors, and global UX/UI trends to inform design strategy and ensure market relevance.
- Analyzing user behavior through data insights to design intuitive and effective user interfaces aligned with business objectives.
- Engaging directly with clients to understand their business goals, target audience, and product offerings, translating these insights into clear design direction and functional specifications.

- Drafting and refining project documentation including Scope of Work (SOW) and functional requirements in collaboration with stakeholders and sponsors.
- Providing ongoing support and iterative improvements for existing websites, updating content and design in line with emerging trends and evolving client needs.
- Tools and technologies: Figma, Adobe Photoshop, Visual Studio Code, HTML, CSS, JavaScript (basic), Google Analytics, WordPress, Joomla.
